CAIRO, QVAE OLIM BABYLON; AEGYPTI MAXIMA VRBS

Pyramides hae in Aegypto nihil aliud fuerunt, quam Regum pecunia
votiosa et fentatio. Cupiebant enim reges, aut potius beluae, co-
romare, hae nomen suum in terram scribere, & longissimam sui
relinquere memoriam, cum tamen nullius rei fama sit in mundo ten-
ior. Nam aut quis scribitur, huius, aut quis rex in sanis aliquam
pyramidem crederit, non consuet.

1. Hic obeliscus vocatur, cuius lapidei vultus, longae postea sen-
tentiatae sunt. 2. In hoc loco habitavit Salomon. 3. Palatium Camporum

MOUNT EISENHOWER, BANFF NATIONAL PARK

In the towns and villages around the volcano the destruction of property was very great, but the generally escaped by timely flight.

In all the towns the terror was wide-spread. Nine distinct craters were opened, and lava streams, some sixteen feet deep, ran down the sides of the mountains, destroying everything in their paths. Several villages were almost entirely buried in ashes, as ancient Pompeii was in the eruption previously described in Naples, people were almost smothered with the shower of dust, cinders, and sand that poured down from every window was kept closed, and every traveller through the streets was compelled to protect himself by carrying an umbrella; and there were serious fears, on the part of the timid, that the beautiful Italian city was to play the tragic part of Pompeii in a repetition of the terrible scenes of eighteen hundred years ago.

The mysterious 'living rocks' of Romania: Bizarre Trovant stones give 'BIRTH' to new stones, growing by up to 2 inches every 1,000 years

- The misshapen stones in Romania are naturally formed by geological processes
- Trovant stones are mainly composed of a stone core surrounded by a sand shell
- Minerals in rain form a reaction within that builds pressure and makes them grow

Its energy surrounds us,

and binds us.

Luminous beings are we, not this crude matter.

Basically, morphic fields are fields of habit, and they've been set up through habits of thought, through habits of activity, and through habits of speech. Most of our culture is habitual...

Rupert Sheldrake

The idea is that there is a kind of memory in nature. Each kind of thing has a collective memory. So, take a squirrel living in New York now. That squirrel is being influenced by all past squirrels.

Rupert Sheldrake

contrast, the human owner shares a close emotional bond with his dog. The dog knows when its owner is coming. This isn't due to once acquired knowledge, but the entwining of feelings and contact – something the British biologist Rupert Sheldrake calls **morphic fields, or the memory of nature.**

According to this, every tool acquired somehow quickly becomes something everyone can draw on: newly-learned knowledge and intensive feelings are transferred into the consciousness of all animals of a specific species, whether blue tits or apes, and can even cross between species as with the human and the dog. How else to explain that weird moment, as it so often happens, when I think intensively of an old friend whom I haven't seen in a long while and decide to write him a letter, only for the phone to ring, and it's him! ... or my wife.

Hysterical strength

4 languages

Article Talk

Read Edit View history Tools

From Wikipedia, the free encyclopedia

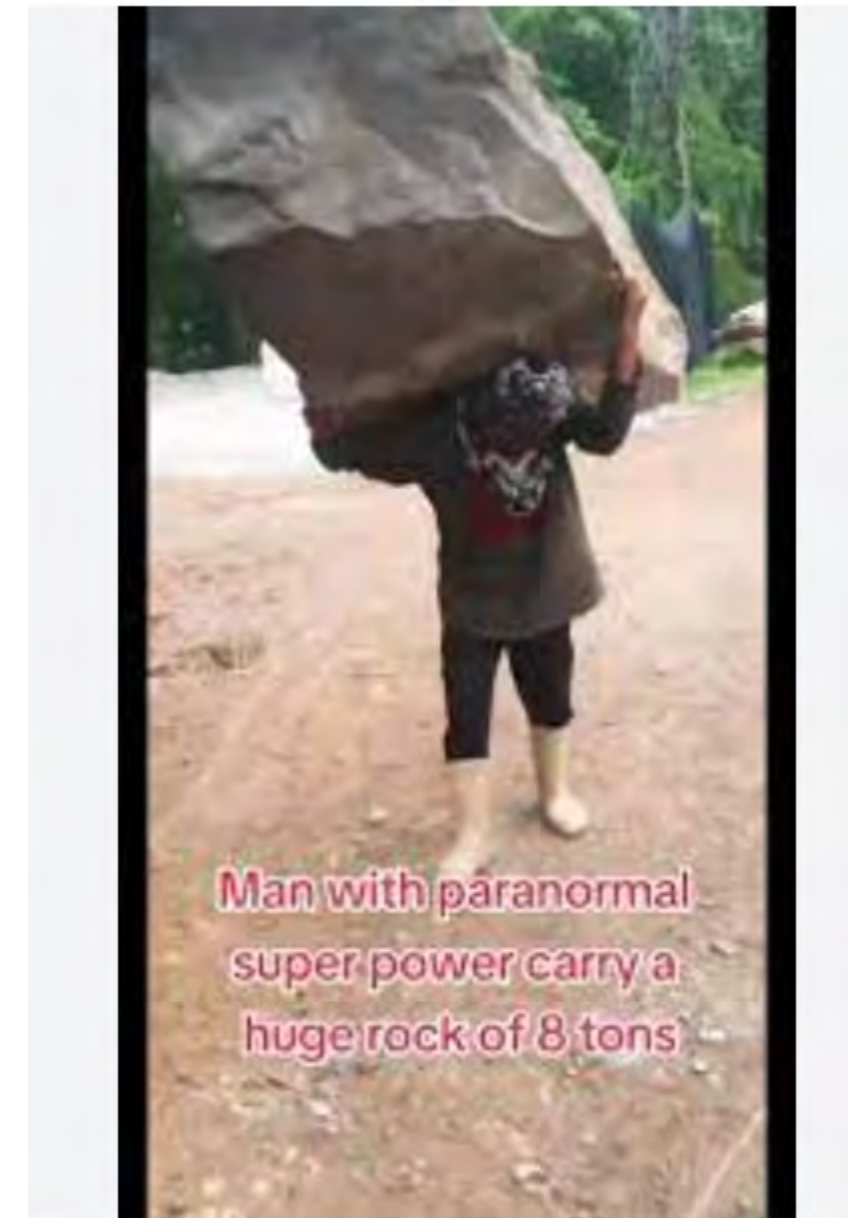

Hysterical strength refers to a display of extreme **physical strength** by **humans**, beyond what is believed to be normal, usually occurring when people are in, or perceive themselves to be in **life-or-death situations**.^{[1][2]} It was also reported to be present during situations of **altered states of consciousness**, such as **trance** and alleged **possession**. Its description is mostly based on **anecdotal evidence**.

The name refers to **hysteria**, a **nosological** category that included bouts of **superhuman strength** as one of the possible **symptoms**, but in **Europe** this had also been an attribution in previous cases of alleged **demonic possession**.^{[3][4][5]} Charcot imputed to the phase of hysterical attacks called **clownism** the presence of strength and agility not consistent with the age and sex of the person, which before in the Catholic ritual of **exorcism** was attributed to demonic force. Thus, the cause of the phenomenon began at that time to be addressed by the investigation of **insanity**.^[5] During that period in the 19th century, the term *hysterical strength* could also be found in the intersection of such fields, scientific and religious, for instance appearing in a statement by a physician for the **Society for Psychical Research**.^[6]

It was also described in reports of **trance** or **possession** in several other cultures, as for example in the **New Testament** (**Mark 5:4**) or in **shamanic practices**.^{[7][8]}

Unexpected strength is claimed to occur during **excited delirium**.^{[9][10]}

- In 2012, in **Michigan**, Austin Smith (age 15) lifted a car to save his grandfather pinned underneath.^{[26][27]}
- In 2013, in **Oregon**, teenage sisters Hannah (age 16) and Haylee (age 14) lifted a tractor to save their father pinned underneath.^[28]
- In 2013, in **Salvage, Newfoundland and Labrador**, Cecil Stuckless, a 72-year-old man lifted a Jeep to save his son-in-law pinned underneath.^{[29][30]}
- In 2015, in **St. John's, Newfoundland**, Nick Williams lifted a four-wheel-drive vehicle to save a young boy pinned beneath its tire.^[31]
- In 2017, in **Temple Terrace, Florida**, Kenny Franklin, lifted an SUV from a state trooper after an accident.^{[32][33]}
- In 2019, in **Ohio**, Zac Clark, a 16-year-old football player, lifted a 3,000 lb car when he heard his neighbor call
